

Warranty for Nest products

Nest Pros can offer their customers a warranty extension for select products. Only Nest Pro edition products that are sold and installed by Nest Pros in the US, UK and Canada qualify for the extension.

In select countries, if you purchase a Nest product and installation from a [Nest Pro](#), you can get an Extended Pro Warranty. The extended warranty will be activated when the product is added to your account.

If you purchase your Nest thermostat from Google or an authorized reseller, it comes with a standard warranty.
